Amgad Mohamed Abd Nabhan

QUALITY MANAGER | QUALITY MANAGEMENT | MANUFACTURING QUALITY

El Haram, Giza, Egypt | Mobile: (+2) **01002663787** | Email:eng.amgad@yahoo.com

Personal Summary

Quality Management professional with extensive experience in home-appliance manufacturing and supplier industries, with strong exposure to Incoming Quality Control (IQC), Process Quality Control (PQC), Final Product Quality, Quality Assurance, Supplier Quality, and Market Compliance.

Experienced in leading quality teams, establishing and improving quality systems, driving root-cause analysis and corrective actions, and supporting continuous improvement.

Strong manufacturing background covering sheet metal, plastic injection, coating, and related feeding industries.

Hands-on knowledge of SPC, Cp/Cpk, FMEA, Control Plans, 8D, RCA, Poka-Yoke, LPA, Kaizen, PDCA, FPY/RTY and COPQ

Core Competencies

* Quality Management Systems & Quality Strategy
* IQC / PQC / OQC / QA / Final Product Quality
* Supplier Quality Management & Incoming Inspection
* SPC, Process Stability & Cp/Cpk
* PFMEA / FMEA & Control Plan
* 8D Problem Solving, RCA, 5 Why & Fishbone
* CAPA, NCR & Customer Complaint Management
* Layered Process Audit (LPA) & Process Audits
* Poka-Yoke, Kaizen, PDCA & Continuous Improvement
* FPY / RTY / COPQ / Defect, Rework & Scrap Reduction
* Market Compliance & Product Quality
* Quality KPI Development & Performance Management
* Manufacturing Processes: Sheet Metal, Plastic Injection, Coating

Professional Experience

SAMSUNG ELECTRONICS – Beni Suef, Egypt | Quality Manager [01/2026 – Till now]

Lead quality activities covering Process Quality Control, for sheet metal manufacturing, plastic injection, EPS manufacturing and assembly lines.

Manage and develop quality teams, quality standards, inspection methods, control plans and performance monitoring.

Drive data-based problem solving using 8D, Root Cause Analysis, 5 Why, Fishbone, SPC and corrective/preventive actions.

Monitor quality KPIs including defect rate/PPM, rework, repair, scrap, FPY/RTY, and initiate improvement actions.

Quality assurance and line audit to ensure that the lines follow the work instruction and quality practices throughout the line patrols and VOPs.

Training and mentoring the employees on quality standards, processes and improvement techniques.

Reporting and documentation for quality reports and dashboard for management, and maintain audit records, compliance report and improvement logs.

Work cross-functionally with Manufacturing, Engineering, Supply Chain, Production and CS to prevent recurrence of quality issues.

Support process capability and stability improvement through SPC and Cp/Cpk analysis.

Midea Toshiba – 6 of October, Egypt | Head of Quality [10/2021 – 12/2025]

Lead quality activities covering Incoming Quality Control, Process Quality Control, Final Product Quality and market compliance.

Led the quality function across manufacturing and supporting supplier processes.

Ensure the availability of all measuring equipment & inspection instruments needed for in process inspection and its calibration status.

Established and followed quality controls for incoming materials, manufacturing processes and final products.

Led quality problem-solving activities and customer complaint response using structured RCA and 8D methodology.

Implemented and improved quality tools including FMEA, Control Plans, SPC, Poka-Yoke, audits and corrective actions.

Coordinated with production and engineering teams to reduce defects, rework and quality losses.

Discuss on daily basis with production team the product defects to prevent & reduce cause of defect occurrence.

Issue the inspection of in process products related documents (work instruction, inspection instruction....etc).

Laboratory: testing the products based on IEC standard and Toshiba standard, follow up the production quality based on lab test plan, validation for the new products, and calibration for all measurement instruments.

ELectrostar group – 6 of October, Egypt | Labs Manager [10/2019 – 10/2021]

Responsible for testing the new products according to the international standards.

Responsible for creating new test benches and testing methodologies.

Responsible for selecting the test equipment to achieve the required tests and measurements.

Responsible for supporting the Quality team in testing and measurement for the products.

Responsible for creating new test and measurement software using LabVIEW in the production line process and in Labs.

Responsible for creating the Lab work plan according to the work load.

Universal group – 6 of October, Egypt | Labs Manager [10/2015 – 10/2019]

Responsible for testing the new home appliances products according to the international standards.

Responsible for testing the new innovations of the products.

Responsible for communications with the suppliers for the products components.

Responsible for communications with the production and quality team of the factory for the online testing process.

Responsible for following up the new project work plan.

ECT – 6 of October, Egypt | Technology Manager [10/2006 – 10/2015]

Responsible for Programming and Design the test stations by using LabVIEW and DAQ.

Responsible for follow up the installation test stations at Labs or Production Lines.

Responsible for the starting up the turn key solution.

Manufacturing & Quality Expertise

* Home Appliances Manufacturing
* Sheet Metal Processes
* Plastic Injection
* Coating / Surface Treatment
* Incoming Materials & Components
* Process Quality Control
* Final Product Inspection & Testing
* Supplier Quality & Corrective Actions

Selected Quality Tools & Methodologies

SPC | Cp/Cpk | FMEA/PFMEA | Control Plan | 8D | RCA | 5 Why | Fishbone | 5M+E | Poka-Yoke | LPA | PDCA | Kaizen | Pareto | Check Sheets | CAPA | NCR | AQL | FPY | RTY | COPQ | OEE

Education

Bsc of Electrical Engineering, Helwan University, 2006

* Department: Electrical Power and Machines
* Grade: Very good with honor
* Ranking: Seventh

Additional Information

* Nationality: Egyptian.
* Birth Day: 19 .April.1984.
* Marital Status: Married.
* Military Service: Exempted.

Achievements

- Outside Egypt Achievements

China at 2017:

Visiting the supplier for discussing the new models and the products innovation.

HAIER Washing Machine Factory.

MIDEA Air Condition Factory.

MIDEA Fans and Radiator Factory.

MIDEA Washing Machine Factory.

China at 2023:

Training for month in the main Midea factory in Hefei and Guangzhou.

Main target of training is Midea culture, learning the Midea methodology in quality and manufacturing like VOP, DM and problem solving methodologies.

Saudi Arabia 2012 to 2015:

Visiting the customers for installation and starting up the projects.

Carrier KSA (SAMCO) Factory.

Al-Jazera for Gas Cooker Factory.

El-Essa for Refrigerators Factory.

El-Zamel for Air Condition Factory.

- Inside Egypt Achievements

MIRACO – Carrier:

QC , R&D Test and Measurement system for air conditions using LabVIEW and National Instruments Data Acquisition , Labjack Data Acquisition , Digimax sensors for temperature , pressure , current….

Electrolux - Olympic Group for Home Appliances:

Test and Measurement system for Washing machines, Refrigerator and Gas Cooker using National Instruments, Labjack Data Acquisition and LabVIEW software.

Universal Group for Home Appliances:

Testing stations for the washing machine production line,

Line Capacity 1000 Washing machine per shift.

R&D test stations for the Washing machine, Air conditioning, Freezer and SDA Labs.

Quality test system for Gas Cooker using LabVIEW. and Kiethley Data Acquisition.

Frseh for Home Appliances :

Quality test system for Gas Cooker using LabVIEW.

Unionaire for Home Appliances:

Quality test system for Gas Cooker using LabVIEW.

Maddar Group:

Monitoring System for Power and Energy Stations , this system is used to monitor and log all the electrical components Voltage , Current, Power , Power factor , Energy , etc.

Cairo company for Medicine:

Autoclave control and SCADA system for Medicine Company.
